SALT LAKE CITY, UTAH, MONDAY, JUNE 8, 1903

PRICE FIVE CENTS.

MR. TULLOCH COMES BACK WITH ORIGINAL CHARGES

Says They Have Not Been Explained Away and Not Even Specifically Denied.

More Food For Thought For the Postmaster General and the Roosevelt Administration.

W. Tulloch, formerly cashier of the Washington City postoffice, under date of June 3 has written a letter to Postmaster General Payne in response to replies received from Postmaster Merritt of the Washington postoffice and others to the charges of maladministration made by Mr. Tulloch against the management of the Washington postoffice. A large part of Mr. Tulloch's letter is in defense of counter charges made by Mr. Merritt against Mr. Tulloch. Mr. Tulloch says that the charge that under his regime as cashier of the Washington postoffice quarterly payrolls were required to be signed in blank, even if true, would only "produce a smile in Washington, where probably the greater portion of governmental employes sign payrolls in blank." The charge that "a false voucher" had been put in while Mr. Tulloch was cashier, he says, was only an attempt to discredit him, and even Mr. Merritt admits that the transaction "was directed by the postmaster, recognized by the assistant postmaster, and the money retained was paid to persons duly designated."

Facts in the Case.

The facts, he says, are that substisponse to replies received from Post-

Facts in the Case.

The facts, he says, are that substitutes named by the civil service commission served the postoffice without pay except when they filled temporarily the places of clerks and received their pay. As some clerks failed to pay their substitutes, the postmaster directed that previously to payment of clerks who had been absent, the signed receipts in full of the substitute should be put in the clerk's pay envelope, and the amount it called for retained and paid to the substitute by his division superintendent. The particular instance cited by Postmaster Merritt, he says, was where an employe after a drunken spree, was fined rather than dismissed and the money divided by his superintendent among substitutes for services rendered, the postmaster to do this. Mr. Tulloch declares that while in office he did report irregularities to his immediate superiors and the inspectors. He denies the charge that he was mercenary with the late Postmaster Willett and says Mr. Willett himself suggested upon the proviso of division with high officials in the department: as suggested upon the proviso of division with high officials in the department: as suggested upon a suggested upon a complimentary roll; that arrears in Porto Rico were not fully discovered; that useless junkets were frequent to Porto Rico and Cuba; that patrons paid from the military postal service, and that salate ceasing all service, and that salate ceasing all service, and that salate were also continued after services had ceased to take up irregular expenses."

Comparison Urged.

As to the reply of former First Assistant Postmaster General Heath, Mr. Tulloch says: "All that is necessary is to compare my specific charges with his general denial."

He then reaffirms that his representations remain in all essential particulars true and not disapproved, and closes with a denial that there is any office within the gift of the postoffice department that he would accept or that he ever authorized his friends to seek his reinstatement.

Charges Ventilated.

Wyoming State Treasurer About to Resign.

(Special to The Herald.)

Cheyenne, June 7.—Much speculation is being indulged in among politicians and others over the state relative to the successor to State Treasurer Henry G. Hay. The treasurer Hans not yet resigned, but it is asserted that he will probably do so on July 1. There appears to be a fitch in the resignation plans, however, and Mr. Hay may delay his action somewhat.

As is well known, the office of state treasurer is one of the most sought after of any in the gift of the people of Wyoming, except, of course, the senatorial and congressional plums. Not even the office of governor is as desirable from a financial standpoint as that of state treasurer. The latter office pays the same salary as that of governor, but the privilege of aming the depository of the state's funds is worth considerable. In other words the use of the state money is worth, it is said, from \$5,000 to \$8,000 per year to the treasurer. It is said that Mr. Hay is desirous of installing his son. Harry G. Hay, in the latter was reported to have

WONDERFUL PROPERTIES OF THE NEWLY DISCOVERED POLONIUM

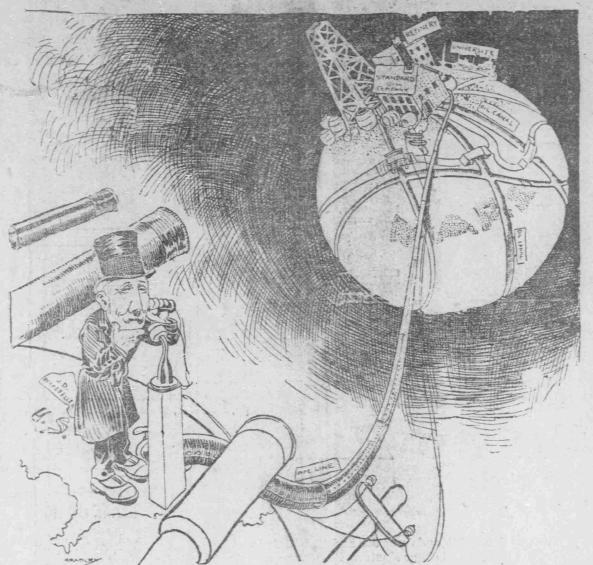

Berlin, June 7.—At today's session of the Chemical congress, Professor W. Markwald of Berlin showed to the electro-chemical and physical section a smudge of dark powder on a piece of paper, which was the first time that any of those eminent scientists had seen the metal polonium, discovered by Professor Broskator of Berlin read a paper on the sterilization of drinking water with ozone and on ozone waterworks, the German electricians having succeeded in producing at small cost a concentrated solution of ozone.

any of those eminent scientists had seen the metal polonium, discovered by ProSesor and Madame Curie of Paris. The latter doubted whether polonium was a primary element, or related to bismuth but Professor Markwald demonstrated that it was indeed a primary element. He exhibited a bit of metal weighing 15-100 of a grain, which was produced from two tons of uranium at a cost of \$75. It is more sparsely distributed in uranium than xenon, the most rarified gas, is in the atmosphere.

Chemists Astonished.

Professor Markwald proceeded to give a marvelous exhibition of the powers of his speck of polonium. It intercepted a strong current of electricity passing through the air from the generator to the receiver, the air ceasing to be a conductor for the flashes. The room was then darkened and pieces of barium, platinam and zinc blende placed near the polonium glowed with a bright, greenish light. The assemblage of chemists was thrilled with
